FIELDS OF ACTION

- Restaurants
- Hotels
- Shopping Centers
- Retails
- Gyms
- Education
- Temples
- Hospitals
- Corporate Offices
- Smart Buildings
- Sports Fields
- Mass Transit

- **Multi-Zone Ambient Music Systems**

Multi-zone ambient music system: separate music in different areas with independent volume, ideal for public spaces like restaurants, bars, hotels, offices. Controlled via central panel or mobile, adaptable for events

APPLICATIONS : Restaurants, Hotels, Shopping malls, Retail stores, Gyms, etc.

- **PAVA Systems**

The PAVA system is utilized in public buildings for relaying emergency messages and crucial announcements. Comprising distributed speakers and a central control system, it broadcasts pre-recorded or live messages. Its primary purpose is to ensure clear and effective communication during emergencies, facilitating safe building evacuation.

APPLICATIONS : Airports, Train Stations, etc.

- **Sound Masking**

Sound masking utilizes continuous background noise (white noise) to diminish undesirable sounds in settings like offices, hospitals, and hotels. It enhances privacy and comfort by establishing a more conducive environment. In offices, it boosts concentration and productivity, while in healthcare and hotels, it fosters relaxation and a positive experience. Sound masking aligns with contemporary design trends, prioritizing well-being and sensory satisfaction.

APPLICATIONS : Corporate offices, Hospitals, etc.

- **Automated Audiovisual Systems**

Elevating Your Visual and Auditory Experience!
Experience audio and video excellence with our automated audiovisual systems. Simplify and enhance your presentations and meetings with cutting-edge technology that adjusts automatically to your needs.

APPLICATIONS : Board rooms, Meeting rooms, Directories, Multipurpose rooms, etc.

- **Lighting & Shades Automation System for offices**

Automated systems that manage office lighting and blinds through sensors and wall controls. They adjust automatically according to needs, providing comfort, efficiency, and energy savings.

APPLICATIONS : Office Floors, Corporate Buildings, etc.

- **LED Screens**

LED screens consist of light-emitting diodes arranged in pixels to display images and videos. They are valued for their brightness, durability, and energy efficiency, and are popular for advertising, signage, and large indoor and outdoor displays.

APPLICATIONS : Monitoring rooms, Digital signage, Retail windows, Stages, Outdoor advertising, etc.

- **Room Scheduling Systems**

Effortlessly Manage Meetings Across Screens!

Streamline your meeting control with seamless integration across various screens. Our system easily integrates with MICROSOFT®, OFFICE 365™, GOOGLE CALENDAR™, 25LIVE®, and EMS. Book, conclude, or extend meetings with intuitive clicks. Simplify...

APPLICATIONS : Board rooms, Meeting rooms, Directories, Multipurpose rooms, etc.

- **Interactive Displays**

An Interactive Display is a sophisticated device that integrates a high-quality touchscreen with advanced technology, enabling dynamic real-time interaction and collaboration. These displays find utility across diverse environments like conference rooms, classrooms, and training centers. They facilitate the presentation of multimedia content and seamless touchscreen engagement, fostering active user involvement in communication and learning endeavors. In essence, Interactive Displays stand as potent instruments for interactive visual communication.

APPLICATIONS : Board rooms, Meeting rooms, Directories, Multipurpose rooms, etc.

- **Security Cameras**

Security cameras are electronic devices designed to capture images and videos of specific areas for the purpose of enhancing security and preventing theft, acts of vandalism, and other crimes. They can be installed indoors or outdoors, be fixed or mobile, and use high-definition technology with advanced features such as motion detection and night vision. They can be monitored in real-time by a security team or remotely controlled through an application on a smartphone or tablet. They are an important tool for improving the security of homes, businesses, and public spaces.

APPLICATIONS : Restaurants, Hotels, Shopping malls, Retail stores, Gyms, Corporate Office, Corporate Buildings, etc.

- **Networks**

Internal networks of the Internet are computer systems used within an organization or company that allow communication and resource sharing between devices. These networks are usually LANs connected to the Internet through a router or gateway and use technologies and protocols such as Ethernet, Wi-Fi, TCP/IP, DNS, and DHCP. They are managed and configured by the organization's IT personnel to ensure their security and efficient use of network resources.

APPLICATIONS : Hotels, Corporate Office, Hospitals, etc.
